ANNUAL REPORT

OF THE

BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL,

For the Year Ending December 31st, 1899.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, February 5, 1900.

To His Excellency, Murphy J. Foster, Governor of the State of Louisiana, and Ex-Officio President of the Charity Hospital Board of Administrators:

Your Excellency—The annual report of the Board of Administrators of the Charity Hospital, with the reports of the House and Finance Committees and its officers, furnish full information of work accomplished and expenses incurred during the year 1899.

As stated in the reports of the Secretary and Finance Committee, the current expenses of the year amounted to \$119,584, and the revenues to \$125,100.

The auctioneers' fees exceeded by \$6000 the receipts from the same source for several years previous, and enabled us to tide over the year without encroaching on the reserve fund.

In view of the fluctuating character of the sources of revenue outside of the State appropriation, and of the increasing expense following the erection of the Richard Milliken Memorial, we would respectfully direct the attention of our legislative bodies to the need for a larger appropriation.

In the report of the House Committee will be found a statement of expenditures for the renovation of the Hospital, amounting to \$11,000, with a further account of disbursements for works of improvements, fully described, and amounting to \$22,600.

This report, as well as that of the House Surgeon, also directs attention to the necessity for a larger corps of trained female nurses to supply the male medical and surgical wards. In this regard the Hospital is lamentably deficient and not abreast of the times. For its correction there will be needed a separate building for the accommodation of nurses, which we are not at present in a position to construct.

From the Clerk's and House Surgeon's report, 9149 patients were admitted and treated during the past year. Of these, 948 were residents of Mississippi.

During the year, 812 major surgical operations were performed, and 3514 accident cases received attention.

In the Out-Clinics 21,803 patients were treated, 69,999 consultations given, and the Ambulance Corps responded to 1417 calls.

The recent and unfortunate outbreak of smallpox in the Charity Hospital, and its rapid spread throughout the building, demonstrates the need for a special building in which suspected cases of contagious and infectious diseases may be isolated pending their development. We have the plans for such a structure, but our special fund, derived from legacies and donations, is at the present time inadequate for the purpose.

During your administration this institution has been particularly fortunate in bequests and donations. From 1892 to the present time it has received \$247,174, of which \$100,000 was donated by Mrs. Milliken for the erection of the Richard Milliken Memorial Hospital for Children.

It is gratifying to report upon the increased importance of the Female Training School for Nurses. Under the able and conscientious supervision of Miss Adelaide Huyghe, the young ladies of the corps have done very effective and faithful work, for which we thank them.

As the executive officer of the Charity Hospital, its able House Surgeon and his efficient assistants are entitled to our warmest praise, as also the other officers of this institution; the Visiting Staff, the Resident Students, Ambulance Corps, and employees of the Hospital in general. All have labored with unity of purpose and have left nothing to be desired. The harmony has been perfect and gratifying.

To our worthy Secretary, who is always at his post, we return our sincere thanks, and also to the firm of Farrar, Jonas & Kruttschnitt, to whom we are indebted for many favors.

Of Sister Agnes and her corps of Sisters, we fail in words to express our appreciation of their great services in this institution. We can but thank them.

To my colleagues and to the committees upon whom rest the burden of responsibility and labor, the Chairman returns his heartfelt thanks.

Very respectfully,

E. S. LEWIS, M. D., VICE-PRESIDENT.

\$33,600 00

Annual Report of the House Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA,
NEW ORLEANS, February 5, 1900.

To the Vice President and Board of Administrators:

Gentlemen — We beg to present the following summary of the most important work of the past year.

Their magnitude and large cost enforces the fact that the outlay of money necessary for their accomplishment could not have been afforded were it not for the Special Fund—a fund altogether made up of legacies and donations, and altogether outside of the appropriations made by the State.

This fund is now comparatively reduced, and, in consequence, necessary improvements have to be held in abeyance—such, for instance, as the erection of a building for contagious diseases, dining-room and dormitories for the employees or help, particularly for skilled help—such as trained nurses—so badly needed to satisfy the Hospital requirements in that line, all of which must be finally supplied.

It is to be hoped that public attention will be directed to these wants of the Hospital.

these wants of the Hospital.		
The expenditures from the general fund of the Hospital for general repairs, repainting, kalsomining, etc., have been large, aggregating	811,000	00
In addition, the disbursements on account of the iron fences, Schillinger walks and general improvements of the grounds on the adjacent square, together with amounts advanced on account of Milliam Hamilton and account of the iron fences.	22 222	
count of Milliken Hospital, sum up	22,600	00
Making a total sum expended for the year 1899	7 1000	- 19

principally in permanent works, of

The main work of the year was as follows: The erection of a durable and symmetrical iron fence in front of and extending the entire length of the adjacent square, together with a light iron division fence interiorly placed.

Raising and improvement of grounds of the Milliken Hospital square, Schillinger pavements in front of new square and interior walks around and about the Milliken Hospital.

Iron bridge plates in continuation of those in front of the main Hospital, extending from the late South Robertson to the corner of Magnolia street, on Tulane avenue.

Sanitary improvement of colored wards for females, embracing sanitary closets, bath tubs and improved ventilation, which, together with the iron galleries on the exterior, make it one of the most important improvements of the past year, and one which we confidently believe will result in an enhanced favorable condition of the occupants.

A pavilion for convalescing patients in one of the yards, thoroughly built and provided with comfortable benches, well sheltered from the sun, and which is destined to add to their comfort and improvement.

Many works of a minor character have been added, which it is unnecessary to mention.

The Ambulance Service has been well maintained, and the entire system is in good form.

Before closing this report we cannot forbear bestowing the full meed of praise upon Chief Engineer, Mr. John Ponder, whose assiduous work in his department continues as prompt and reliable as it has always been.

Respectfully submitted,

JOHN T. GIBBONS, WM. G. VINCENT, A. R. BROUSSEAU.

Annual Report of the Finance Committee.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, February 5, 1900.

To the Vice President and Board of Administrators:

Gentlemen—Your Finance Committee beg leave to report as follows:

The outcome for the year has proven much more satisfactory than your Committee anticipated at its inception, owing to an unlooked-for increase in the matter of auctioneers' returns on sales, produced principally by the occurrence of one exceptionally large return (\$4300.00). The general drift of this source of income is towards shrinkage and cannot be definitely relied upon.

The fees from cattle inspection have again diminished and fallen \$1176.25 below the estimate made by your Committee.

The revenue from licenses and gate fees has about maintained itself. The rents from cotton presses have declined from \$3500.00 per annum in former years to \$807.00 per annum now.

Against these changeable sources of income, added to the fixed appropriation of the State of \$90,000.00 per annum, we have to present the annual outlay of \$119,584.00 for the maintenance of the Hospital, inclusive of ordinary repairs.

The necessary enlargement of the institution brings with it increased expenses that have to be met.

The "Special Fund," made up of Legacies and Donations, has been uniformly used for works of improvement, and is largely drawn upon for such purposes. The fund has been reduced to \$37,250.00.

In view of the facts alluded to above, we would earnestly recommend that efforts be made to have the State's appropriation increased.

Respectfully submitted,

R. E. CRAIG, Chairman, HUNTER C. LEAKE, GEO. SEEMAN.

ACKNOWLEDGED BY SISTER AGNES, 1899.

Messrs. Oberle, Henry & Co., brokerage charges, free, \$2 50 at six different times.

Finlay, Dicks & Co., case of toys.

Miss D. Mellon, basket Easter eggs.

Mrs. Alice Demers, Labadieville, La., 12 dozen fresh eggs.

Malcolm Sevein, Johnson street, pictures for children.

Williams-Richardson Co., Ltd., 63 yards canton flannel.

Charles A. Thiel, Fulton street, four dozen bottles Apenta Water.

Mrs. Shields, children's clothing.

Master Harold Fuchs, toys and dolls for children.

A. Lehmann Co., several cases of samples.

Fon Loy Tas & Co., 412 Chartres street, 4 caddy's tea.

Elma and Louise Elliott and Jerome Davis, picture books for children.

D. H. Holmes, 2 dozen story books for patients.

Mrs. Flowers, Rampart street, reading matter.

Mrs. Arnauld, Rampart street, reading matter.

Mr. R. Maurin, Belle Allain, one barrel choice molasses.

Mr. E. Lefebvre, large cake.

Mr. U. J. Virgin, cut flowers several times.

Mrs. I. Newman, confections for children.

Mr. Charlie Farwell, candy and cut flowers for children.

Mr. A. Cardona, turkey and fruit cake.

Abita Spring Water Co., 25 gallons Abita Water, daily.

Mrs. Geo. Denegre, 2 tally-ho rides for children.

J. U. Adams, St. Charles street, large case handsome toys.

Mrs. Maurice Stern, hankerchiefs, hose and toys for children.

Chin Sing, of On Yick & Co., 1107 Tulane avenue, 4 quarter chests tea.

Mrs. Dr. O. L. Pothier, 30 pounds choice candy.

Jos. W. Bowling Co., 10 dozen children's hose.

Owen Cahill, Jackson Grist Mill, 2 turkeys.

Miss Ritta Lehmann, St. Charles avenue, toys for children.

Mr. Robert E. Craig, 2 boxes choice oranges.

Miss Lilly Scooler, dolls and toys for children.

Miss Ada Wilson, toys.

"A Poor Woman," one dollar.

Mrs. H. J. Smith, slippers and dolls.

Mrs. Geo. Seeman, 3 large boxes confections.

Mrs. I. Newman, box choice confections.

Miss W. Wilday, books and toys.

J. Voegtle, Cosmopolitan Hotel, reading matter, weekly.

United Warehouse Co., case of large bottles of Apenta Water.

S. B. L. Leroy, 1734 Second street, reading matter.

Mrs. J. W. Stone, through Dr. E. D. Fenner, \$5.

Miss Janet Drysdale, Miss Hazel Drysdale and Masters Fred L. Fenno and O. W. Chamberlain, large assortment of toys for children.

Messrs. J. Ellwood Lee & Co., Conshohocken, Pa., 100 pounds absorbent cotton.

RICHARD MILLIKEN MEMORIAL ANNEX-PLAY AND SUN-ROOM.

Annual Report of the House Surgeon.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, February 5, 1900.

To the Board of Administrators:

Gentlemen—Signal benefits that accord with the achievements of modern progress adaptable to our facilities and work, have enlarged the scope of this charity to the extent of its fulfillment in practical design, and of which in pleasure and pride I feel honored to report upon. These benefits evince their merit in the economy of management that, aside from medical results, are made obvious in the following statistical detail: During the year 1899 9149 patients were cared for in the Indoor Service, which included 669 remaining on January 1st of the year, and 4971 whites and 3500 colored admitted during its course. This is 764 patients more than were cared for in the previous year, and of the total number, the Hospital daily average, 5864, is significant of a shorter period of detention, that has not been equaled in fourteen years, and that improved methods alone have obtained.

The increase of admissions suffices for an acknowledgment of service that medical inquiry and care make acceptable and expeditious in result.

The discharged list numbered 7286. The mortuary report, including 379 patients admitted in a dying state, is 1290; the death rate in total 13 per cent., and with the moribund number deducted, 9 per cent.

The Outdoor Clinic Service exceeds any previous year of its history in the number of new patients that received attention, namely, 21,803, and to whom 69,999 consultations were additionally given. The increasing attendance in this department

and narrowed allotment of department facilities, will require rearrangement of space for the comfort and convenience of patients in waiting.

In the Maternity Service the births numbered 231; six deaths occurred among mothers, and includes four that were admitted in a moribund condition. The total death rate was 2½ per cent.; the death rate proper is less than 1 per cent.

Our efficient and competent corps rendered speedy aid and succor to 1417 cases of Ambulance service, averaging in time but 26½ minutes for each case. The Ambulances are thoroughly equipped and in excellent working order.

The surgical work of the A. B. Miles Amphitheatre has been exemplary in detail and results; every mechanical aid, specific care and precaution is practiced to the protection and security of patient. Culture tubes and racks for confirmation of diagnosis and test proof of prognosis of surgical disease have been added to its many facilities.

The major surgical operations for the year numbered 812, and the accidents cared for were 3514.

The remaining glass wainscoting of the Amphitheatre is proving sorely defective in giving space for accumulation of dust and the propagation of objectionable animal and vegetable life. It should be replaced by marble to offset this serious defect, and to be in harmony with the Lavatory and Amphitheatre pit.

The medical and surgical histories arranged with the catalogue classification are being carefully bound in convenient and easily handled volumes, which gives security and permanency to their value. The Registrar records 1148 case histories filed in the year's course.

The Pathological Department is ably reported for in the accompanying report of Dr. O. L. Pothier, whose industry, zeal and accomplishment it is my pleasure to commend. The withdrawal of Dr. S. F. Mioton from service in the department was

to be regretted. His competent assistance and diligence had won for him our respect and confidence. Dr. M. Couret, who succeeds him, has several years' training, and is fully competent.

The graduation of the Senior Class of the Training School for Female Nurses occurred in the month of December. The several reports of the School's progress were submitted through your Medical Committee, and are deserving of your especial attention. The question of trained and efficient nursing vitally concerns hospital organization, the modern benefits to patient and the essential of medical result. The report of the Directress is replete with all necessary information of the present deficiency, and her recommendations deserve the most prompt and active consideration, committee commitment and support to consummate. I beg for this your earliest attention.

The Richard Milliken Memorial, furnished and complete, was dedicated on May 4th, and opened for the reception of patients. Its perfection in the charity of sick relief to the infant and child is unrivaled, and in the appreciation of a wide and discerning criticism, it has the credit of a model in hospital construction and appointment.

Improvements perfected during the year have been in matters of practical efficiency, and relate to bath room, closet and lavatory addition to west end of main building; renovation and rearrangement of colored female service to the needs of sanitation, expediency and comfort; increase of three medical wards in the service of the white male and female department, made possible by the occupancy of the Richard Milliken Memorial; the erection of an open-air pavilion for the protection and health-giving benefits to convalescent male patients; the appointment and completion of the X-Ray dark room, vastly improving the service of the apparatus by insuring its efficiency and positive results; the introduction of machinery with electromotor force for the sharpening, polishing and repair of surgical instruments that will prove economical and convenient; removal

of city telephones to a more accessible location, securing promptness and attention to the service and a convenience to the staff. This, with the complement of auxiliaries in lavatories, improved ventilation, and many minor changes, represent the year's additions.

The present duties, increased by improvements made within the last year, enlarge the work of detail and make necessary the increase in the Resident Student Corps of two additional members, the filling of which positions I respectfully recommend be empowered the Medical Committee at the next annual competitive examination. The position of Resident Student is one in which medical knowledge and attainment is the prerequisite, and I desire to further recommend that the grade of applicants be limited to attendants upon no less than three medical sessions of the college course.

The present library location becomes desirable for staff accommodation with its increase in number, and we have selected for your approval space on the upper floor of the main building, appropriate and fitting for library use, and to which its removal is recommended.

The visiting rules adopted for the Richard Milliken Memorial annex, and that exists in every institution throughout the country, have proven admirable, their adoption for the Hospital proper would be of great benefit in lessening the introduction of infectious diseases, in controlling the dietary and medical results, in freeing the institution of harmful and useless food and material introduced through the exercise of the existing privilege, and that materially interferes with the responsibility and scientific care of the sick.

Attention is directed to the increasing number of aged and infirm helpless poor, for whom hospital confinement is an infliction. In the absence of the city's provision for their care, charity instinct impels their admission. Sixty-two are now being cared for in this Hospital. Some effort toward securing

the admission of this class of poor people into the City's Alms House deserves consideration.

Contemplative of the requirement of rearrangement to growing necessities, and efficiency of service in accord with recommendations conveyed in the reports of Training School, and of previous mention, outlines and plans are in readiness for your inspection and criticism.

The engrossing detail of medical work and the vast amount of active service represented in the figures herein mentioned, bespeak the merit of service of the medical staff who shared in this work, and especially my excellent assistants, Drs. E. D. Fenner and J. M. Batchelor.

The Sisters of Charity, than whom there can be none more thorough in the essentials of cleanliness and perfection of detail, contributing the moral and substantial aid to the humanitarian and medical benefits, deserve the acknowledgment in merit, and thanks.

The efforts of our Druggist, Mr. John J. Simeon, the Clerk, Mr. James Leake, and our Engineer, Mr. John Ponder, have been painstaking and efficient, and make pleasant this commendation. The departmental annual reports are herewith presented with my approval.

Perpetuity to the many provisions, innovations and medical benefits, that the wisdom of administration vouchsafe in strengthening the character of humanity and ennobling results, mark the unalterable good that the retiring Governor and your direction have in praise and reward.

Respectfully submitted,

J. D. BLOOM,
HOUSE SURGEON.

Pathological Department.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, February 5, 1900.

To the Vice-President and Members Board of Administrators of the Charity Hospital:

Gentlemen-I beg to submit the following report of work done in the Pathological Department during the year 1899: Specimens of Urine examined..... 5.829 Specimens of Sputa examined..... 867 Specimens of Blood examined 1,906 Specimens of Tumors examined..... 155 Specimens of Cultures examined..... 65 Specimens of Fluids examined..... 18 Specimens of Stomach Contents examined..... Specimens of Vomit examined..... 1 Specimens of Feces examined Specimens of Liver examined 1 Specimens of Water examined 2 Specimens of Pus examined..... 41 Autopsies in which all the organs were examined microscopically 3 Photographs taken, including skiagraphs..... 100 Photomicrographs taken..... 4 Autopsies held..... 242 Specimens mounted for Museum.... 50 9,292

At the beginning of this year investigations were made as to the cause of several cases of meningitis which occurred. We were enabled from severe cases to isolate a diplococcus, which gave all the appearance of the diplococcus meningitidis. The short life of this organism, necessitating replanting every fortyeight hours, and the great amount of routine work, prevented us from keeping a stock culture of it. A few cases of anthrax also furnished field for investigation; from those cases cultures of the organism were obtained and form part of our stock cultures.

In the latter part of the year, culture tubes containing the different media usually used, and sterile tubes and swabs were placed in the Amphitheater, where they are within easy reach of every one at all times. By this means cultures can readily be made at any hour of the day, to be sent to the department for examination. In this way we are enabled to make the examination of cases of diphtheria or other diseases occurring in the Hospital, and secure an early report, as this is sent directly to the ward as soon as examined. The sterile tubes also facilitate the gathering of suspected material at operations in sterile containers, from which cultures can be made with accuracy where it is not thought advisable to make the cultures immediately.

In the past year the specimens of the Museum have been labeled, numbered and indexed.

In concluding, I wish to commend the valuable assistance given me by Dr. S. F. Mioton, the retiring Assistant Pathologist, and also Dr. M. Couret, who has been elected to fill the vacancy of Dr. Mioton, for his assistance during the same year. To Dr. J. D. Bloom, our House Surgeon, I am indebted for his co-operation and the means put at our disposal to facilitate our work.

Respectfully submitted,

O. L. POTHIER, M. D.,

PATHOLOGIST.

RICHARD MILLIKEN MEMORIAL ANNEX-WARD.

Report of Directress.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, December 13, 1899.

Dr. E. S. Lewis and Dr. F. Loeber, Members of the Medical Committee, Charity Hospital, Board of Administrators;

Gentlemen—The tide of improvement in hospital advantage, facilitated through the wisdom and discretion of your Board, has given impetus to the widening of both its educational and practical good.

An alignment in a cause so gracious and judicious is a pride, conceivable to the humility and instrument of my position in the honor it gives to report upon.

The School's Directory now records 81 graduates scattered throughout the South, and spreading the influence of this inspiring fount of charity and sick relief to the untrained and inexperienced multitude.

It is a pleasure to feel that they have continued in harmony with our endeavor, and as a unit, in the ulterior motive of the calling.

The demand upon the part of the public for nurses of our registry continues active, in convincing proof of their adaptability and intelligent training.

The engrossing detail of modern nursing has made evident the unwillingness and inefficiency of the male nurse, and our needs in the matter of the male division becomes, very urgently, a subject for your prompt attention.

It is my desire to have your approval and support in supplying the nursing corps required from the ranks of the pupil female nurses of our School, and in thus widening their opportunities for practical training, add to the fulfillment of a modern nursing system.

The Sisters in charge of the various divisions are all graduates of the School, and will insure proper direction of the pupils and their efficiency. The practical inauguration of this system makes necessary the construction of a home sufficiently large for their accommodation, and to which matter your attention is respectfully asked.

During the past year a larger number of applications were received than of any previous year. The total in number was 243, of which 18 were received. Four lacked the necessary qualifications and were released, and two resigned. The seventeen remaining pupils, comprising the Junior Class, give every promise of efficient and successful nurses, and will now advance to the senior grade, the junior to be again formed from the accepted number of applicants.

Miss Adelaide F. Huyghe, the Superintendent, has given every attention to the guidance of the classes in the essentials of duty and study. Her interest and industry evoke pleasure to mention and affection to commend.

The invalid cooking classes continue as a part of the teaching, and the massage instruction by Miss L. Woodin add the full benefit of a replete curriculum.

The course of study is essentially the didactic teaching of our able Faculty of Lecturers, whose true worth is told in the public's appreciation of our graduates, and for which they have reason for pride and our grateful acknowledgment.

The Senior Class, eleven in number, were commended to the Faculty for the test of merit for graduation. The recommendation implied their progress in study, attainment, character distinction, and favor.

I am confident that, as an addition to our list of graduates, they will add to the good name of our institution and School.

The year's work has proven uneventful in matters of serious

importance, and with this pleasing termination of the present session, I must acknowledge the kindness of your favor and the wisdom of your counsel and direction.

My thanks go out to your colleagues of the Board, and to our Governor, for the interest and concern in the prosperity of this institution.

I would feel remiss of duty to omit mention of my pleasure and appreciation of our honored House Surgeon, Dr. J. D. Bloom, whose assistance and counsel I value, and to whose efficient and helpful assistants, Drs. E. D. Fenner and J. M. Batchelor, I feel gratefully indebted.

The furtherance of our work to the needs herein referred will largely augment the School's purpose. The change is in time with modern methods, and to the object aim of science and provision.

Respectfully submitted,

SISTER AGNES,
DIRECTRESS.

Report of the Chairman of the Faculty.

CHARITY HOSPITAL, STATE OF LOUISIANA, NEW ORLEANS, December 13, 1900.

Dr. E. S. Lewis and Dr. F. Loeber, Members of the Medical Committee, Charity Hospital Board of Administrators:

Gentlemen—The Faculty is pleased in the privilege of reporting upon the marked success of the undertaking that has contributed so pertinently to the educational and public good of this institution's work, and that has been so gratefully received.

The profession of nursing is in accord with feminine instinct and sympathy.

Exalting to character and scientific in study, it invites the intelligent woman to a work of love, humanity and ambition.

Appreciable talent, education and character mark the requisites, and the work begets its own interest and love of performance.

The professional standing, respect and ihonorary reward, voice the sentiment of excellence that is the requital of effort, and unanswerable to a higher medical attainment.

Our classes have been representative of the spirit that inspired and encouraged the zeal of its undertaking, and has given the satisfactory result.

A full curriculum encourages intelligent effort and secures the capable and conscientious pupil.

The studies and course previously outlined have been maintained, and the practical work and demonstration made the theme of examination and reviews.

The examination of the Senior Class for graduation gives me the pleasure of recommending for the Diploma and Medal of the School, Miss Annie Bullard, Mrs. Ellen Burns, Miss Claudia Cowan, Miss Ida Edwards, Miss Mary Ennermoser, Miss Lydia Fayers, Miss Agatha Hartman, Miss Nellie Kirby, Miss May Reid, Miss Ella Shepard, Miss Harriette Small.

The class standing has been excellent, and the Faculty tender to them sincere congratulations.

The vital matter of hospital nursing is fully laid before you in the report of our able Directress, and argues for the essentials of modern hospital facilities that merit our full endorsement, and plea for your consideration.

In the amplification of benefits of every manner and form, the advisedness of her recommendations have always been pertinent and in line with necessity and scientific progress.

The Faculty gives praise to the conscientious effort in the perfection of this institution, approving the intention that will reflect credit upon your Board's wisdom in management, and adding to the further distinction of our Directress, in whom is coupled our confidence and pleasure to honor and respect.

Respectfully submitted,

J. D. BLOOM, CHAIRMAN OF FACULTY.
